EXPERIENCE

Software Developer Intern

6 months

Hitract

- Worked extensively with structure, frontend development and component-based flows in a product environment.
- Built and improved interfaces with React, TypeScript and MUI with a focus on clarity and reusability.

Administrator

2012-2025

Jakobsbergs Vårdcentral - Region Stockholm

- Administration, patient contact, invoices and financial handling with high requirements for confidentiality.
- Developed a strong ability to prioritize, communicate clearly and solve problems for people with different needs.

Various Earlier Roles

2009-2012

Logistics - construction - sales

PROJECTS

LogFix AI

Final project

AI-driven platform that analyzes server logs, identifies root causes and fixes or suggests fixes.

Built as a hackathon/final project with a focus on making log analysis clearer, faster and more useful for debugging.

TrioPick

PWA

Own product and sports app at triopick.se.

Founder & Creator of this PWA app, built from idea to product experience with a focus on mobile use, accessibility and simple interaction.

triopick.se

Nextract

Finalist 2025

React - TypeScript - Express - SQL - AWS - Scrum

Full-stack B2B application developed during CHAS Challenge Entrepreneur. The project was built in a full team from idea and wireframes to a working solution.
