PROFILE

Full Stack Product Engineer with around five years of hands-on software development across independent products, formal education and professional internship experience. Strongest in TypeScript, React, Next.js and Node.js, with experience shipping production web applications, APIs, automated tests and cloud-based solutions. Increasingly focused on AI engineering and AI security, with a strong bias toward ownership and end-to-end product delivery.

EXPERIENCE

Co-founder & Full Stack Engineer | Triopick 2025 - Present | Stockholm / Remote

- Built and operate a live football prediction PWA end to end, from product flows and frontend to APIs, data handling, deployment and maintenance.
- Integrated third-party football data and automated match, prediction and scoring flows; wrote end-to-end coverage with Playwright.
- Grew the product to around 90 real users while iterating on usability, reliability and product behaviour.

Software Developer Intern | Hitract Jan 2025 - Jun 2025 | Stockholm

- Contributed to a production React/TypeScript application used by real users, working inside an established product codebase.
- Built and improved reusable UI components and product flows with React, TypeScript and MUI, with focus on clarity and maintainability.
- Worked with Git-based collaboration, existing architectural conventions, debugging and iterative product improvements.

Healthcare Operations Administrator | Region Stockholm - Jakobsbergs Vårdcentral 2012 - 2025 | Stockholm

- 13 years in a high-volume primary-care environment handling administrative workflows, financial processes, sensitive information and daily operational problem solving.
- Worked closely with clinicians and administrative systems, building first-hand understanding of usability, reliability and workflows in regulated environments.

SELECTED ENGINEERING PROJECTS

LogFix AI | AI Incident Management Platform

- Built an AI-driven incident workflow for ingesting and normalising server logs, identifying likely causes, estimating severity and routing incidents.
- Designed operational flows around rules, escalation and webhooks; explored structured AI outputs and automation beyond chat-style interfaces.
- Tech: Next.js, React, TypeScript, Node.js/Express, MongoDB, Socket.IO; architecture designed around cloud/serverless concepts.

Nextract | CHAS Challenge Entrepreneur Finalist 2025

- Built a full-stack B2B product in a team from concept and wireframes to a working solution using React, TypeScript, Express, SQL and AWS.

EDUCATION

Higher Vocational Education Diploma - Fullstack JavaScript | CHAS Academy 2024 - 2026 | Stockholm

- Two-year software development programme including approximately six months of internship.

Undergraduate College Studies | Santa Monica College 2011 - 2012 | California, USA

- Business, Human Biology and Advanced English.

TECHNICAL SKILLS

Core: TypeScript, JavaScript, React, Next.js, Node.js, SQL, REST APIs, PostgreSQL

Frontend: React, Next.js, Vue.js, Tailwind CSS, MUI, responsive UI, accessibility

Backend & Data: Node.js, Express, authentication/JWT, GraphQL, WebSockets, MongoDB, PostgreSQL, Prisma, Supabase

Delivery & Quality: AWS, Docker, Git, GitHub Actions, CI/CD, Vercel, Jest, Playwright

Growing specialization: AI Engineering, AI Security, Python, agentic workflows, AI-assisted development

Languages: Swedish (native), English (professional), Spanish
